

# Available Coatings for Hutch Products

## Finish Coatings

### Soft Coats

- Ready for the road, no top coating required
- Excellent corrosion resistance in the harsh transportation environment
- Pliable but tack-free finish coating with “self-healing” characteristics
- Low VOC
- Available in black or gray
- Performance test results available

### Galvanized

- Hot-Dipped Zinc coating applied to meet the requirements of ASTM A123
- The proven performance of hot-dip galvanizing ensures an extremely durable and corrosion resistant coating for optimum protection

## Top-Coat Ready Primer

### Black Primer

- Our standard coating on all Genuine Hutch parts and units
- High-performance, low VOC water reducible low gloss black
- Compatible with most conventional top coats
- Applied after a multi-stage wash/pretreatment process to insure excellent adhesion to the base metal

## Unfinished

### Unpainted – Fully Assembled

- Offered for those who use materials such as zinc rich primers or soft coats that perform best when applied directly to bare metal

### Galvanized Prepped – Partially Assembled

- Should you decide to have the galvanizing done yourself; Hutchens can provide many products partially assembled and ready for the Hot-Dipped Zinc process
- We will provide technical support so you can finish the assemblies by installing rubber bushings, springs, etc., which cannot be galvanized

If you have any questions about our coating capabilities and versatile options, or you have special requirements to discuss, please contact Hutchens today. **We're here to help. Just ask us.**
