New Decals for Sliding Suspensions

Hutchens Industries has created new warning/operational decals for sliding suspensions that utilize the EZ Pull and P3 pneumatic pin release systems. Previously, these sliding suspensions required the use of both a standard slider operational decal (16088-01) and a supplemental pin release decal. These multiple decals have now been consolidated into one decal specific to the sliding suspension's pin release system.

As a result of the above, the supplemental P3 Operational Decal (18281-01) and the EZ Puller Decal (19786-01) will no longer be available.

The required decal for each pin release system is as follows:

PIN RELEASE SYSTEM	DECAL P/N REQUIRED
STANDARD PULL (NON-EZ PULL)	16088-01
EZ PULL	24762-01
P3 PNEUMATIC PIN RELEASE (W/PULL HANDLE)	24721-01
P4 PNEUMATIC PIN RELEASE (BUTTON ACTUATED)	24294-01

Should you have any questions about this bulletin please, contact Hutchens Industries at 1-800-654-8824.
