

You Asked... *We Listened.*

When our customers asked us for a lower-capacity spring for a variety of *utility trailer applications*, we expanded our line to meet their needs.

We now offer two great choices of three-leaf, high-arch, steel springs:

- Our 12,000 lb. GAWR springs for 42.5" and 44" axle spacings
- Our 15,000 lb. GAWR springs for 49" axle spacings

Either can be used with the Hutch 9700 Series Suspension and configured to fit your needs.

*The difference is durability.
The quality is Hutchens.*
