

Advancing the Practical Application of Suspension Technology

May 26, 2026

Dear Customer,

Since our price reduction at the beginning of 2026, steel and raw material costs have continued to rise. We had hoped these increases would only be temporary, but instead they have remained persistently high. As a result, we need to adjust our pricing at this time. We will continue to monitor these cost pressures closely and remain hopeful that market conditions will improve.

The following price changes will take effect on July 1, 2026:

- Roll formed & structural body rails – Up 18%
- All other body rails – Up 10%
- All 9700/9600 suspension kits – Up 12%
- High volume sliders, including the Series 10, 9036i, & 9801/9811 – Up 9%
- All other sliders & frames – Up 6%

Thank you for your continued business and support.

Sincerely,

Collin Parker
Vice President Sales
Hutchens Industries, Inc.
